EDUCATION

Fort Worth, TX **Texas Christian University** **Aug 2023 – May 2027**

- B.S. in Computer Science | Dean's List
- ***Coursework:*** *Data Structures and Algorithms Analysis, Object-Oriented Programming, Database Systems, Computer Architecture, Compiler, Web Development, Networks, Cybersecurity, Design Patterns, Linux/Unix, Calculus, Discrete Math, Linear Algebra.*

EXPERIENCE

Software Engineering Intern **Citi** **Jun 2026 – Aug 2026**

- Engineered an **AutoSys ETL monitoring dashboard** using **React** and **TypeScript** to track ~**600 data processing jobs**, flagging repeated failures and SLA breaches to reduce incident detection time by **67%** (from 30 to 10 minutes).
- Developed **Spring Boot** middleware to aggregate job metadata from internal APIs, normalize execution statuses, and streamline communication between the monitoring dashboard and backend services.
- Extended **Scala** aggregation workflows for **Volcker Rule compliance**, partitioning trading data across **5 business segments** to generate segregated regulatory reporting datasets.
- Built automated tests using **Jest**, **React Testing Library**, **JUnit**, and **Mockito**; contributed to CI/CD deployment workflows using **Jenkins** and **Kubernetes**.

Software Engineering Intern **Rakuna** **Jun 2025 – Aug 2025**

- Collaborated with cross-functional stakeholders to design and deploy a QR code check-in interface, focusing on UI performance optimization and intuitive user experiences to streamline event operations through **React Context API**.
- Resolved a critical concurrency bug in third-party chat integrations by engineering a dynamic session identifier system in **Ruby on Rails**, eliminating cross-user data leakage.
- Improved recruiter search accuracy by **70%** through ID-based query filtering in **Rails** and reduced QA environment setup time by **50%** by containerizing the application and internal tools using **Docker**.

Computer Science Tutor **Texas Christian University** **Aug 2024 – Present**

- Broke down complex topics in Data Structures and Calculus into digestible concepts during 1-on-1 sessions, directly enabling **over 30 students** to complete challenging assignments.
- Provided hands-on project guidance for **Java (OOP)** and **Scala (Functional Programming)** assignments, instructing students on best practices for debugging, tool selection, and code architecture.

PROJECTS

ChessLand: Voice-command aided chess for blind people

- Engineered a low-latency, real-time game interface utilizing **TypeScript** and **WebSockets** (Socket.io) to instantly process asynchronous speech commands routed through the **OpenAI Whisper API**.
- **Implemented WAI-ARIA standards** to ensure full compatibility with screen readers and assistive technologies.
- ***Tech used:*** TypeScript, JavaScript, Node.js, **Socket.io**, Whisper AI API.

MyAnnoying planner: AI-orchestrated notification app for ADHD

- Engineered an AI-driven notification engine using **Spring Boot** to intelligently analyze, prioritize, and escalate calendar alerts based on real-time urgency metrics.
- Architected a persistent data layer utilizing the Repository pattern and **PostgreSQL** to ensure high-integrity management of complex user schedules and hierarchical task data.
- ***Tech used:*** **Java**, Spring Boot, Expo, React Native, Gemini API, Grok, Claude, PostgreSQL

Pong

- Developed a zero-dependency arcade simulation using **Java AWT**, implementing custom pixel-manipulation rendering and bounding-box collision detection algorithms.
- Engineered a single-player AI opponent using **linear trajectory projection**, calculating ball intersection coordinates to simulate predictive movement.
- ***Tech used:*** Java, Swing, AWT.

SKILLS AND TECHNOLOGIES

- **Programming Languages:** Java, TypeScript/JavaScript, Python, Ruby, C++, C, SQL, HTML, CSS, Elixir, Scala, Assembly.
- **Frameworks:** React, Spring Boot, Node.js, Rails, MUI, TailwindCSS, Bootstrap, Angular, Next.js.
- **Testing & CI/CD:** Jest, React Testing Library, JUnit, Mockito, Visual Regression Testing, Docker, Kubernetes, Jenkins, Git.
- **Database and others:** PostgreSQL, MySQL, SQLite, Docker, Docker Compose, Git, version control, AWS EC2, HashiCorp Vault, REST APIs, Puma, Lynx, Capistrano, Jira, Agile Scrum.
