

EDUCATION

Fort Worth, TX	Texas Christian University	Aug 2023 – May 2027
- B.S. in Computer Science Dean’s List GPA: 3.71 Coursework: Data Structures and Algorithms, Object-Oriented Programming, Computer Architecture, Compiler, Web Technologies, Linux/Unix, Calculus, Discrete Math, Linear Algebra.		

Remote	CodePath	Jun 2024 – Present
Coursework: Technical Interview 101, Technical Interview 102, Web Development 101, Cybersecurity 101.		

EXPERIENCE

Incoming Software Development Intern	Citibank	Jun 2026 – Aug 2026
- Selected for a 10-week internship at Citi’s Irving, TX technology hub, focusing on building scalable, enterprise-grade financial software. - Will collaborate with cross-functional Agile teams to design, develop, and test full-stack solutions. - Anticipated use of Java, Spring Boot, and Cloud technologies to support high-frequency, low-latency banking systems.		

Software Development Intern	Rakuna Co.	Jun 2025 – Aug 2025
- Engineered a resume management feature within the prospect details page, enabling recruiters to add, delete, and save resumes, complete with an ‘undo’ function to prevent accidental data loss. - Developed and launched a full-stack QR code check-in feature, iteratively refined the UI and functionality based on user testing and team feedback to enhance the event check-in experience. - Resolved a concurrency bug in the third-party support chat integration by engineering a dynamic session identifier system, effectively preventing cross-user data leakage. - Optimized the query by implementing ID-based filtering for autocomplete, improving query accuracy for recruiters up to 70%. - Containerize the main application and internal tools to QA environments, eliminating environment configuration errors and reducing team onboarding time up to 50%. Tech used: Ruby, Rails, React, JavaScript, HTML, CSS, PostgreSQL, AWS EC2, Docker, Docker Compose, HashiCorp Vault.		

Computer Science Tutor	Texas Christian University	Aug 2024 – Present
- Broke down complex topics in Data Structures and Calculus into digestible concepts during 1-on-1 sessions, directly enabling over 30 students to complete challenging assignments. - Provided hands-on project guidance for Java (OOP) and Scala (Functional Programming) assignments, instructing students on best practices for debugging, tool selection, and code architecture. Tech used: JavaScript, HTML, CSS, Java, Scala.		

PROJECTS

Chess for the Blind	Github
- Developed an accessible, voice-controlled chess application to enable visually impaired users to play real-time games, adhering to strict WAI-ARIA accessibility standards. - Integrated the OpenAI Whisper API to drive the voice interface, processing asynchronous speech data into valid game commands with high accuracy and low latency. Tech used: TypeScript, JavaScript, NodeJS, Socket.io, Whisper AI API.	

Pong	Github
- Developed a classic 8-bit arcade adaptation using Java AWT, implementing custom pixel-manipulation rendering and bounding-box collision detection without external game engines. - Engineered a single-player AI opponent using linear trajectory projection, calculating ball intersection coordinates to simulate predictive movement. Tech used: Java, Swing, AWT.	

EXTRACURRICULAR

Co-secretary	Omega Delta Phi	Apr 2024 – Dec 2025
- Documented social, fundraising, and volunteer preparations, including managing venues, tools, dues, and a budget exceeding \$3000. - Coordinated collaboration with the other 7 multicultural Greek organizations to organize monthly events with over 100 people.		

SKILLS AND TECHNOLOGIES

- Programming Languages: Ruby, Java, TypeScript/Javascript, Python, SQL, C++, C#, C, HTML, CSS, Elixir, Scala, Assembly. - Frameworks: Rails, React, MUI, TailwindCSS, NodeJS, Bootstrap, Angular, Next.js. - Database and others: PostgreSQL, MySQL, SQLite, Docker, Docker Compose, Git, version control, AWS EC2, HashiCorp Vault, REST APIs, Puma, Lynx, Capistrano, Jira, Agile Scrum.
